

Shading indicates stations or instruments that are currently considered to be “inactive”. This designation is assigned

- *when there has been a permanent cessation of measurements or*
- *when the measurement PI is no longer considered to be active in the NDACC due to the cessation of data archiving at the NDACC Data Host Facility and of communications with the NDACC Steering Committee.*

Ib. NDACC Long-Term Measurement Activities (Locations for each instrument type. See Section Ia for details.)
